

## **Tupu Boat creating and floating event**

Tuesday 14th March

Ahoy there Mateys!

The captains of our ship have been making headway with the sailors investigating sinking and floating, and very soon we will have enough knowhow to make our boat that we know will float.

To create these masterpieces please can you send to school some or more of the following items that your sailor will use to create a floating vessel. Please send these in a labeled bag. The list is endless but here are some helpful ideas...

- corks
- rubber bands
- small plastic containers and lids
- blue tack
- Feathers
- small pieces of wood
- walnut shells
- String
- Tinfoil
- Small boxes
- Toothpicks or skewers
- Fabric

The last day to send these to school is Thursday 30th March, so we can create and launch our vessels in our home made lagoon on Monday 3rd April. May the seas be calm, and no sharks circling!

We will be capturing this flotilla launching on Seesaw.

Yours Heartily,

ScallyWag Molloy, Quarter Master Wilby, Pirate Laing, Admiral Brown and overseen by Commodore Bird
